

PROMOTER DECK · SEPTEMBER 2026

# SPARTAN OS ON ANUBIS CHAIN

Built by the foundation that built Origin. Running on a chain they own.  
Ninety days in, paying every twelve hours.

# THE NEXT CHAPTER OF A STORY **YOU MAY ALREADY KNOW.**

Anubis Foundation: two years, five continents, twenty countries, more than a hundred projects. Three of them shaped everything that follows.

01

## Capital

Anubis Foundation invests in Web3, DePIN and infrastructure

PROOF

Five continents · twenty countries

02

## Origin

DeFi 3.0 on LGNS. Staking, bonds, protocol-owned liquidity, a global community

PROOF

2.5M holders at the peak

03

## WebKey · Melos

How users enter Web3 and what they do there: identity, gateway, entertainment

PROOF

16M users, as stated

04

## Anubis Chain

Their own Layer 1. Mainnet April 2026

PROOF

100M+ transactions

05

## Spartan OS

The first application built to bring people onto it

PROOF

Live since 16 June 2026

### WHY IT MATTERS TO YOU

Most projects start from nothing: no users, no assets, no track record. This one starts with millions of holders who already know the foundation's name, and a chain the foundation controls.

### SAME TEAM, SAME CODE

Spartan OS runs 137 smart contracts on the codebase that ran Origin and Awake. The CertiK audit has been submitted. The people, the code and the chain are the same three names.

THEY HAVE DONE THIS BEFORE, **AT SCALE.**

A historical market snapshot of the Origin ecosystem on AVE. Not today's prices. Proof that this foundation can build a market of millions and keep it alive.

2.5M

Holders of LGNS at the snapshot

**\$1.4B**

Circulating market cap, LGNS

# \$200M

Liquidity pool, LGNS

91,000

Transactions in one day

**\$2.1B**

Market cap of gLGNS, the second Origin asset

# \$55M

Still in the Origin pool on Polygon today, two years on

Anubis Chain went live in April 2026. Fees are paid in gasDAI, pegged to the dollar. Everything below is on the public explorer at [browser.anubispace.org](https://browser.anubispace.org).

## Cumulative transactions

## Addresses

## Smart contracts deployed

## Tokens on the chain

Average block time

Fees pegged to the dollar, the same every day

RM is the token you earn and use. GD is the governance token, 390,000 fixed. TempleRaid, with GoPlay, went live on 6 September. The dashboard on 14 September 2026 read:

### USDT in the RM liquidity pool

RM holders

RM price, launch on 16 June to 14 September

GD price, 4 May to 14 September

of RM supply staked on-chain

Treasury in USDT

Four of them open from \$1. Every RM you earn passes through the same turbine before it reaches your wallet.

Four of them open from \$1. Every RM you earn passes through the same turbine before it reaches your wallet.

## Flexible staking

**0.6% A DAY**

0.3% every twelve hours on your RM, compounding by itself. In from \$1, out whenever you like. About 20% a month if you leave it alone.

ENTRY  
From \$1

LOCK  
None

## Long-term staking

1.1 – 1.3% A DAY

180, 360 or 540 days, from \$1. Principal back in daily portions from day one, interest on top, extra rewards on top of that.

ENTRY  
From \$1  
LOCK  
180, 360

## Burning bond

**1.5%** A DAY, NET

From \$500. Releases 250% of the order, 150% net. Adds 20% energy and a 3% GD airdrop. Unlimited volume. No compounding.

ENTRY  
From \$500

CAP  
2.5× · no maximum order

## Level income

**8 · 4 · 2%** OF DOWNLINE ROI

Of the ROI your first three levels earn, paid to you every twelve hours. This is the one stream that uses energy.

PAID  
Every twelve hours  
NEEDS  
Energy to withdraw

## Rank reward

**\$15 – \$1,200+ A DAY**

V1 to V12 from the DAO pool, paid daily. The larger leg qualifies the rank, the smaller pays the reward. V1 from about \$15 to \$25 a day; every rank's range is on 09.

V1 NEEDS  
\$500 · 3 qualified directs ·  
\$10,000 per leg

RANKS  
V1 to V12

PAID EVERY TWELVE HOURS. CAPPED IN DOLLARS.

Principal comes back daily from day one. The cap is set in USDT the moment you enter. Rates float with the platform; the cap does not.

| POSITION                      | DAILY RATE, AS STATED      | ON \$1,000, A DAY | ON \$1,000, A MONTH             | CAP ON TOTAL PAYOUT | PRINCIPAL         |
|-------------------------------|----------------------------|-------------------|---------------------------------|---------------------|-------------------|
| Flexible · from \$1 · no lock | 0.3% per 12 h · 0.6% a day | \$6               | about \$180 · \$200 compounding | None                | Withdraw any time |
| 180 days · from \$1           | 1.1% a day                 | \$11              | about \$330                     | 4× entry value      | Released daily    |
| 360 days · from \$1           | 1.2% a day                 | \$12              | about \$360                     | 4.5× entry value    | Released daily    |
| 540 days · from \$1           | 1.3% a day                 | \$13              | about \$390                     | 5× entry value      | Released daily    |

## WHAT NO ONE ELSE DOES

Other Olympus-style systems hold your principal until the term ends. Here it comes back in daily portions from day one, alongside interest and extra rewards.

## WHAT THE CAP MEANS

\$1,000 in at 540 days can pay out at most \$5,000 of RM value, all sources combined. Then the position is complete and you open a new one. That ceiling is what makes the rate believable.

## EXTRA REWARDS

Long-term positions only. Funded by 35% of the extra sell tax and claimable every twelve hours. They do not compound, so claim them daily.

SAME \$1,000. FIVE DAILY NUMBERS.

Simple daily rate as stated, on a \$1,000 position, before team income and rank rewards. Compounding not included.

ON \$10,000

\$60, \$110, \$120, \$130 or \$150 a day. Between \$1,800 and \$4,500 a month, before a single team member.

PER MONTH, ON \$1,000

About \$180 flexible (\$200 compounding), \$330 at 180 days, \$360 at 360, \$390 at 540, \$450 on a burning bond.

## WHERE THE CEILING SITS

Flexible has no cap and no lock. At the stated rates the 360 and 540-day positions reach their ceiling in about ten months, the burning bond in about three. Then you open the next one.

# BUY RM BELOW MARKET. OWN CONDITIONS, OWN CAP.

Bonds are bought from the same dashboard but are their own product. A promoter should never present them as staking.

| BOND                      | ENTRY      | WHAT YOU BUY                 | DAILY                            | CAP              | EXTRAS                     |
|---------------------------|------------|------------------------------|----------------------------------|------------------|----------------------------|
| Liquidity bond · 180 days | From \$1   | RM at 2% to 5% below market  | Paid like the 180-day stake      | 4× entry value   | None                       |
| Liquidity bond · 360 days | From \$1   | RM at 4% to 10% below market | Paid like the 360-day stake      | 4.5× entry value | None                       |
| Liquidity bond · 540 days | From \$1   | RM at 6% to 16% below market | Paid like the 540-day stake      | 5× entry value   | None                       |
| Burning bond              | From \$500 | 250% release, 150% net       | 1.5% a day, net · no compounding | 2.5×             | 20% energy · 3% GD airdrop |

## WORKED EXAMPLE

\$1,000 into a 540-day liquidity bond at 15% off buys RM worth \$1,150. At \$30.46 per RM, your entry price is \$26.21.

## STAKING OR BOND

Staking releases RM faster and adds extra rewards. A bond buys more RM under the same ceiling. Ask which the person wants to hold.

## THE BURNING BOND

How leaders buy energy for team income, and one of only two ways to obtain GD. Minimum \$500, no maximum.

# TWO LEGS, NOT THREE. THE RANK PAYS DAILY.

8% of the ROI on your first level, 4% on the second, 2% on the third, every twelve hours. Then twelve ranks paid daily from the DAO pool, with rank-differential, same-rank and override (overtaking) rewards of about 10% to 15% on top.

| RANK | PERSONAL STAKE | DIRECTS (\$100+) | EACH OF TWO LEGS  | RANK REWARD | APPROX. DAILY, REFERENCE ONLY |
|------|----------------|------------------|-------------------|-------------|-------------------------------|
| V1   | \$500          | 3                | \$10,000          | 5-10%       | \$15 - \$25                   |
| V2   | \$1,500        | 4                | \$50,000          | 8-15%       | \$80 - \$180                  |
| V3   | \$3,000        | 5                | \$150,000         | 10-20%      | \$150 - \$300                 |
| V4   | \$5,000        | 6                | \$300,000         | 15-25%      | \$300 - \$500                 |
| V5   | \$7,000        | 8                | \$600,000         | 20-35%      | \$800 - \$1,200               |
| V6   | \$9,000        | 10               | \$1,200,000       | 25-45%      | ≈ \$1,800 - \$3,780           |
| V7   | \$11,000       | 12               | \$3,000,000       | 35-55%      | ≈ \$6,300 - \$11,550          |
| V8   | \$13,000       | 14               | \$6,000,000       | 45-65%      | ≈ \$16,200 - \$27,300         |
| V9   | \$15,000       | 16               | \$12,000,000      | 55-75%      | ≈ \$39,600 - \$63,000         |
| V10  | \$18,000       | 18               | 2 × V9            | 65-85%      | ≈ \$93,600 - \$142,800        |
| V11  | \$20,000       | 19               | 2 × V10           | 75-95%      | ≈ \$216,000 - \$319,200       |
| V12  | \$50,000       | 20               | A V11 in each leg | 85-100%     | ≈ \$489,600 - \$672,000       |

LEVEL INCOME, EVERY TWELVE HOURS

$8 \cdot 4 \cdot 2\%$  OF DOWNLINE ROI

On the ROI of your first three levels, before any rank.

TWO LEGS, TWO JOBS

The larger leg qualifies the rank; the smaller pays the reward.  
V1: \$500 staked, three qualified directs, \$10,000 in each leg.

SAME RANK, DIFFERENT PAY

AICS scores each account on holdings, activity, contribution and retention. Rewards move with smaller-leg volume, the block reward rate and that score: two V6s can be paid differently.

Approximate daily team rewards, reference only. V1-V5 as stated on 7 Sept 2026; V6-V12 supplied by Spartan OS on 16 Sept 2026 from the daily block reward rate. Actual rewards vary with smaller-leg volume, the block reward rate, AICS score and team structure. Not fixed, not guaranteed. Energy applies to level income only: 0.2 RM burned per RM, or a 360-day stake.

# BALANCE FIRST. PRICE SECOND.

O<sup>2</sup>, RM's adaptive balancing protocol, is positioned by Spartan OS as a global first: Olympus DAO and Origin, upgraded so the rules adapt to the market. It balances supply and demand and protects liquidity. It does not set the price.

TURBINE

### Buy one to one

1:1

Every RM you earn is claimed into the turbine. You buy the same amount on the DEX, wait 24 hours, and both are yours. Every payout is also a purchase.

|          |            |
|----------|------------|
| WAIT     | RATIO      |
| 24 hours | One to one |

SELL TAX

### Panic costs money

5% → 30%

Buying is free. Selling starts at 5%. If the price falls more than 5% against its rolling average, the tax climbs in steps to 30%. Slow selling is cheap; dumping is not. The aim is to slow cascades, not to block exits.

|         |                   |
|---------|-------------------|
| BUY TAX | REASSESSED        |
| 0%      | Every three hours |

BURN AND BUYBACK

### Supply goes down

65%

1.2% of every sale buys back RM and GD and burns them. Of any extra tax, 65% is burned outright.

|               |              |
|---------------|--------------|
| OF EVERY SALE | OF EXTRA TAX |
| 1.2%          | 65% burned   |

INCENTIVE POOL

### Holders get paid for the dip

35%

The other 35% of extra tax goes to anyone with \$200 or more in a 360 or 540-day position. When others panic, you are paid.

|                     |              |
|---------------------|--------------|
| MINIMUM             | OF EXTRA TAX |
| \$200 in 360 or 540 | 35% shared   |

As stated by Spartan OS in the 14 September 2026 briefing and the O<sup>2</sup> core interpretation deck. O<sup>2</sup> reads TWAP, trade price, buy and sell volume and liquidity depth every three hours; price is a signal, not the verdict. It can defend liquidity and slow concentrated selling; it cannot manufacture demand. The market decides the price.

# NINETY DAYS OLD. NOT NINETY DAYS LATE.

The first project on a new chain from a foundation with a record. The positions that matter are the ones taken before the second and third applications arrive.

FIRST

First project on the chain

Anubis Chain has one consumer application today. The roadmap names a second and a third. Leaders who build now inherit every user those applications bring.

MAINNET  
April 2026

APPLICATIONS  
One live, two  
named

FAIRER

Built for leaders who work

Two teams, not three. Caps that other Olympus-style systems never had. Principal back daily. A score that pays the active leader more than the passive one.

TEAMS  
Two, not three

PRINCIPAL  
Back daily

CHECKABLE

Nothing to take on trust

# ADD. BRIDGE. BOND.

Seven steps, one evening. The bond comes first; staking comes once you are in and hold RM bought from your leader. The links below open on click and scan from a phone.

- 1 Install Bitget Wallet, write the seed phrase on paper, switch to Anubis Chain (chain ID 6714); other wallets add it by hand
- 2 Bridge five dollars of DAI from BNB Chain, the bridge address typed and never taken from a chat: it arrives as gasDAI, the fuel for every move
- 3 Buy USDT on an exchange, withdraw to BNB Chain, bridge it to Anubis through app.anubisbridge.com or GaleBridge, a small amount first
- 4 Join through your leader's referral link or code; the referrer binds on the first connection, so never from a public chat
- 5 Buy the 540-day liquidity bond with USDT: RM below market, released daily, cap 5× in USDT fixed at entry
- 6 Claim every twelve hours through the turbine; import RM and GD. Staking comes later, with RM bought from your leader
- 7 Set your two teams and book your first call. Send them this deck
